

Issue:

We retrieved updated MSSQL gateway table descriptions. After we retrieved the data we encountered the following error when trying to move outbound Invoice data from AS400 -> Gateway

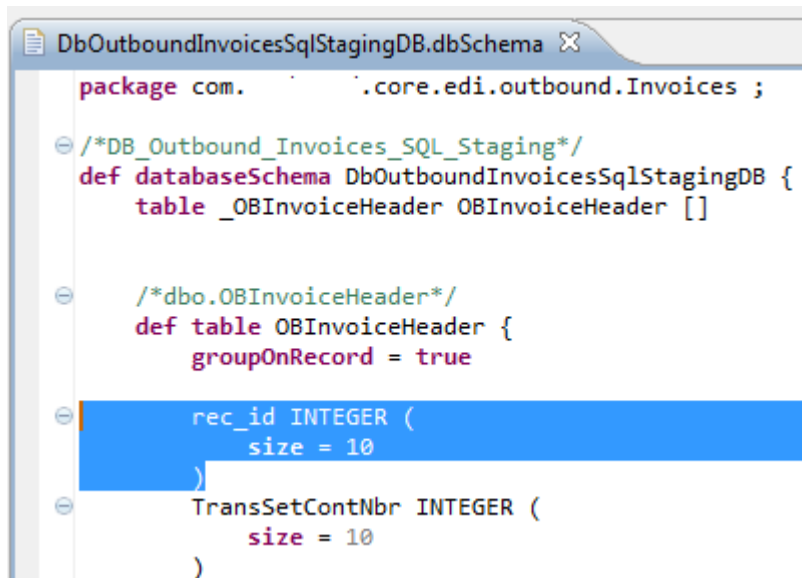

Message : **Cannot insert explicit value for identity column in table 'OBInvoiceHeader' when IDENTITY_INSERT is set to OFF.**

State : 23000

Error Code : 544

SOLUTION:

1. Delete SQL controlled 'control' field **rec_id** in each instance of the related tables.
2. Save updated schema
3. Run process

```
package com. ....core.edi.outbound.Invoices ;

/*DB_Outbound_Invoices_SQL_Staging*/
def databaseSchema DbOutboundInvoicesSqlStagingDB {
  table _OBInvoiceHeader OBInvoiceHeader []

  /*dbo.OBInvoiceHeader*/
  def table OBInvoiceHeader {
    groupOnRecord = true

    rec_id INTEGER (
      size = 10
    )

    TransSetContNbr INTEGER (
      size = 10
    )
  }
}
```
